

HQ Constructions Pty Ltd

Environmental Policy Statement

MPOL06

HQ Constructions Pty Ltd is committed to achieving and pursuing the best environmental practice by mitigating impacts on the environment during construction, and conserving and enhancing its use of resources so that ecological processes are maintained, and that the total quality of life, now and in the future can be increased. The Company has an ongoing commitment to reducing pollution.

An Integrated Management System is in place which addresses all these requirements and which establishes and monitors a program of activities relating to the Environment including:

- Complying with ISO 14001, environmental legislation, regulations and codes of practice as set by the Environmental Protection Authority and other authorities relating to the protection of the environment
- Defining roles and responsibilities for environmental management

Procedures are in place which address all these requirements and which establishes and monitors a program of activities relating to the Environment including:

- Development of both general and site specific environmental management plans which outline environmental aspects of concern as well as environmental protection measures to diminish the identified risks
- Identification of activities carried out by HQ Constructions Pty Ltd that affects or interacts with the environment and consultation with employees and subcontractors to encourage the reduction of the environmental impacts of our business
- Provide ongoing education and training to all of our employees
- Provide guidance and set clear and precise procedures to attain and maintain those goals and to commit financial, physical and human resources to achieve them
- The setting of measurable objectives and the monitoring of performance against these objectives.

This Policy Statement is reviewed annually to ensure its ongoing relevance and suitability.
